INFORMATION TO BE INCLUDED IN TENDERING DOCUMENTS
STANDARD WEIGHTINGS FOR TENDER EVALUATIONS
Professional Service Contractors (PSC) and General Building Contractors (GBC)

Standard weightings for PSC tenders are typically:

Criteria	Comparative Price	Value Select		
		Simple	Medium	Complex
Price	85%	30%	25%	20%
IPP / ECT	15%	15%	15%	15%
Non-Price	0%	55%	60%	65%
Total	100%	100%	100%	100%

Standard weightings for GBC and Managing Contractors tenders are typically:

Criteria	Comparative Price	Value Select		Fee Only
		Medium Risk	High Risk	MC, ECI, TFP, D&C
Price	85%	70%	60%	30%
IPP / ECT	15%	15%	15%	15%
Non-Price	0%	15%	25%	55%
Total	100%	100%	100%	100%

** Note that, following a "Registration/Expression of Interest" from potential tenderers, the split between Price and Non-Price items may be amended to reflect that Non-Price elements have already undergone a level of evaluation, as a precursor to short listing of applicants.*

** Where ECT / IPP weightings exceed 15% (such as northern economic regions, etc), the percentage increase for that element will reduce the percentages in other criteria. For PSC's the "non-price" criteria weighting will reduce by the equivalent amount. For GBC's the "price" criteria will reduce by the equivalent amount.*
