

# Emerson Rail Level Crossing

At the intersection of Cross Road and South Road, Black Forest

We are improving safety along the rail network and will be upgrading the rail signalling system around the Emerson rail level crossing.

## What's happening

We are upgrading the signalling system. This will include testing of the alarms and signals.

The work will be managed remotely, with no workers required on site, and will be carried out at night when no passenger trains are operating.

During this time, we will be running test trains to test the system.  
**Please look both ways for trains.**

## What to expect

The signal upgrade will include testing of the alarms and signals.

You may hear some noise from test trains which will also activate the rail level crossing at the intersection of Cross Road and South Road.

### When

Sunday 20 July 2025

### Hours of operation

1.30am to 5am

### Where

Emerson rail level crossing  
(at the intersection of Cross Road and South Road, Black Forest)
