

Gawler Rail Electrification Project

Works Notification

As part of the Gawler Rail Electrification Project, the Department of Planning, Transport and Infrastructure (DPTI) advises that works will be undertaken next week adjacent the Gawler rail corridor near Gawler railway station.

Location: adjacent the rail corridor, near Eighteenth Street and Dean Street, Gawler (see map overleaf).

When: intermittently from 7am, Wednesday, 9 October, until 7am, Monday, 14 October, weather permitting.

Activities will include:

- Relocating existing overhead power and communications cables to underground conduits.
- Installation of new, and removal of redundant, SA Power Networks poles on either side of rail corridor.

Traffic management:

- Eighteenth Street and Dean Street will be under traffic management while these works are in progress. Signage will be in place to advise motorists of changed conditions.
- During night works there may be a need to close Eighteenth Street and Dean Street at times to ensure the safety of work crews and motorists. While this closure is in place, diversions will be available via Seventeenth Street and Barnett Road (see map overleaf).
- Access to residential and business properties, and to the Gawler railway station, will be maintained at all times.

Details regarding any electricity outages will be managed and communicated by SA Power Networks.

Work crews will make every effort to minimise the disturbance to residents and businesses.

Thank you for your patience as we undertake this important project.
