

Cross Road and Fullarton Road Intersection Upgrade

Project Update

Major construction is now complete with all lanes now fully open for use.

We would like to sincerely thank the local community, particularly residents around the intersection and on Euston Avenue, for your patience and understanding during the works to upgrade this important intersection.

Minor finishing works will continue until March 2024 and will involve replacement of pavers, signage, line marking, kerbing, service access cover adjustments and drainage system servicing.

As part of the finishing works, night works will be undertaken intermittently in various locations through and around the intersection from Sunday 7 January 2024 until project completion.

Occasional lane and speed restrictions will be in place to help safely undertake these final works.

Access to properties will be maintained throughout these works, however the project team will contact individual property owners if driveway access is to be temporarily affected by the works.

Some noise disturbance can be expected at times while these works are completed; however, the work will be managed to minimise disturbance to nearby residents and businesses as much as practically possible.

You may notice some additional vehicle movements on local roads while these completion works are undertaken.

There will be no works on site between Saturday 23 December 2023 and Sunday 7 January 2024.

Site storage

Following the decommissioning of the site compound on Euston Avenue in October 2023, a small area on the southern side of Euston Avenue will continue to be used for storage of materials until project completion. This will help us to complete the project as efficiently as possible.

Urrbrae Gatehouse

The relocation of the Urrbrae Gatehouse to its new location within the University of Adelaide Waite Campus is continuing, with completion expected in mid-2024.

More information on Urrbrae Gatehouse can be found on the [Urrbrae Gatehouse](#) webpage.
