

Wynn Vale Drive and Bridge Road Junction Upgrade

What we heard summary

The Department for Infrastructure and Transport (the Department) is working to improve access and safety at the junction of Wynn Vale Drive and Bridge Road in Gulfview Heights. This forms part of the State Government's election commitments, to upgrade, or investigate potential upgrades, in the northern suburbs to improve safety, access and make travel easier for all users.

Following initial consultation in late 2022, the Department developed a proposed concept design for the Wynn Vale Drive and Bridge Road Junction Upgrade. This design was released in mid-June 2023 for community feedback. Thank you to everyone who took the time to provide feedback.

Community Engagement

A Project update was distributed to over 750 properties in the local area, with information on the proposed design, a link to the online survey, and an invitation to attend community information sessions in the area. Two community information sessions were held throughout the consultation period and 61 responses were submitted via the online survey.

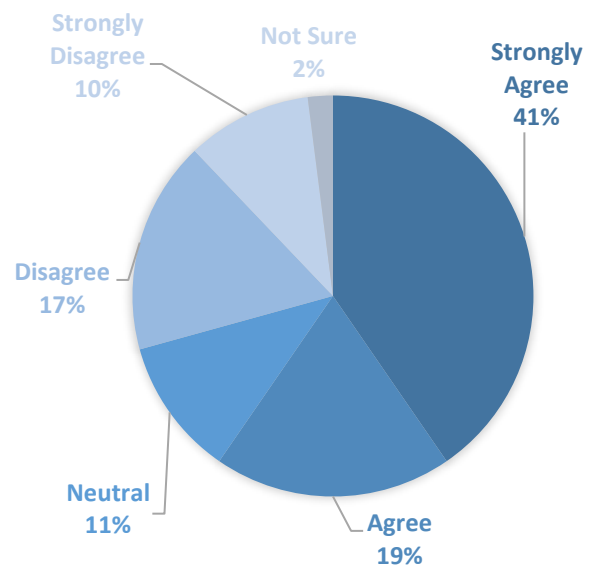

What you told us

60% of respondents gave a positive response when asked if the proposed concept design would improve congestion, access, travel time, and motorist safety at the junction.

Other feedback

Other key themes of feedback received included:

- **Bus Stop 43C** – the overwhelming majority of people strongly preferred to see this bus stop retained and indented in its current location.
- **Left Turn Lane on Wynn Vale Drive** – feedback was received to consider the provision for a left turn from Wynn Vale Drive into Bridge Road at any time with care.
- **Removal of right turn function into and out of Christine Avenue from Bridge Road** – some people highlighted the removal of the right turn function as a concern due to travel times.

Average sentiment towards the proposed design and whether it addresses, congestion, travel times, and safety.

Next steps

This invaluable community feedback will help inform the final design of the upgrade, which we will release before construction commences. Early works, including service relocations, are expected to commence in the coming months. Advance notice of these works and construction timeframes will be provided to the community closer to the time.
