

Gawler Rail Electrification Project

Park Terrace, Salisbury level crossing temporary closure

The Australian and South Australian governments are jointly funding the electrification and modernisation of the Gawler rail line which will deliver a faster, cleaner and more reliable service, delivering an electrified network through Adelaide from Gawler to Seaford.

As part of the Gawler Rail Electrification Project, the Park Terrace level crossing will be temporarily closed to undertake testing of the new signalling system. This will include running test trains intermittently within the rail corridor.

Location: works will be undertaken within the rail corridor, **with the temporary closure of the Park Terrace level crossing.**

When: works will be undertaken from **6am Sunday, 27 February to 6am Monday, 28 February 2022**, weather permitting.

Traffic management and detours: to safely facilitate these works, the level crossing will be **closed to all traffic during this period**. Detours will be in place to direct motorists to an alternative crossing via Salisbury Highway (refer to map). Please plan ahead, allow extra travel time and take extra care when workers are on site. Observe speed limits, lane restrictions and traffic controllers when travelling through the area.

Access to local businesses and residences in the area will be maintained during these works. Please continue to support the local businesses. Pedestrians and cyclists are advised to take care when travelling through the area. Pedestrian access will be maintained via a detour to Brown Terrace (refer to map). Pedestrians are advised to follow the direction of traffic controllers and signage. Every effort will be made to minimise impacts to the community.

There will be no changes to public transport services.

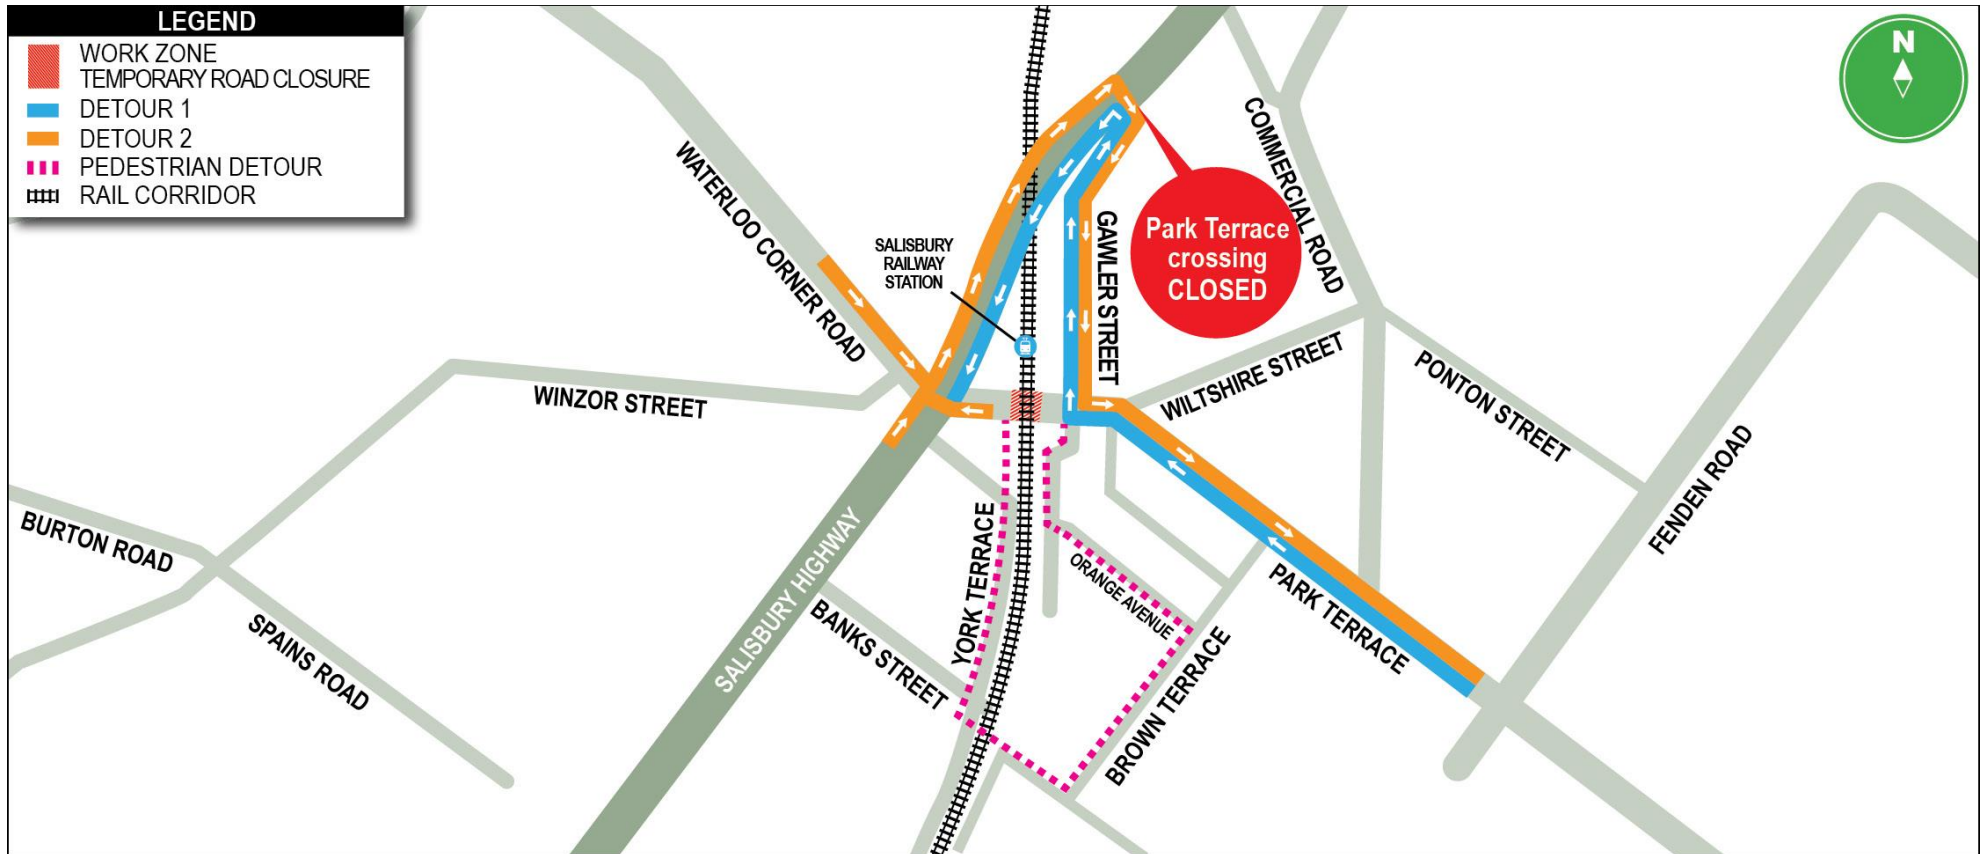

What you can expect: works will involve making changes to the signalling system at the level crossing, with test trains running intermittently. Please pay attention when using the dedicated pedestrian crossings and look out for oncoming trains. Some noise disturbance can be expected at times while these works are completed, however the work will be managed to minimise disturbance to nearby residents and businesses as much as practically possible.

Government of South Australia
Department for Infrastructure
and Transport

Critical testing is underway on the Gawler rail line as the electrification project enters its final stages. The project is now closer to completion with services expected to be commencing in April.

The Department appreciates your co-operation and patience while these important works are undertaken.
